hi, co-authors. thanks for your comments on the manuscript. i've made some changes and attached a revised version with track changes so that you can see what i've revised. below i've added a few notes in response to some of the comments. if you want to know why i didn't change other things, just call or send an email. you have a short time to review the changes i've made, if you want, while i add the references. after that i hope to put it into clearance, maybe as soon as tomorrow afternoon. thanks! jj

- by convention, i hyphenated mode of action and weight of evidence only when they are used as modifiers.
- my approach to abbreviations was to put only abbreviations that were in the main body into the abbreviation list. abbreviations that occurred only in the tables were defined there. abbreviations that occurred in the tables and main body were listed only in the abbreviation list. if the journal wants something different, i assume they'll let us know.
- i didn't want to expand text much because we're just under the 5000-word limit for the main text (4983 words).
